NEWS RELEASE

Elbit Systems of America's Enhanced Vision System selected for the COMAC C919

Airline operators benefit from reduced visibility approach minimums and lower landing credits

MERRIMACK, New Hampshire, June 12, 2015 – Elbit Systems of America, LLC, a wholly owned subsidiary of Elbit Systems Ltd., is pleased to announce that it has been selected by the Shanghai Avionics Corporation (SAVIC) to provide the Kollsman Enhanced Vision System-Superior Performance (EVS-SP™) for the COMAC C919 aircraft. Elbit Systems of America, working with official sales representative, East Wonder, Inc. secured the contract with SAVIC which enables future operators of the C919 to select the EVS-SP through the aircraft manufacturer.

The EVS-SP offers the latest proven commercial technology in cooled enhanced vision systems, by providing outstanding capabilities in degraded visibility along with high resolution in a single, weight-saving unit. The EVS-SP provides C919 operators the ability to see through some of the worst visibility conditions confronting pilots in the Asia Pacific region. Additionally, the Civil Aviation Authority of China (CAAC) has adopted current FAA rules that provide the same operational benefits as experienced in the United States, allowing pilots to go past the traditional decision height (DA/DH) down to 100 feet, even if they do not see the landing area with natural vision.

According to the International Air Transport Association, China will surpass the United States to become the world's largest commercial air passenger market in the next two decades. To prepare for this increasing number of flights in China, the CAAC has recently implemented avionics equipment requirements to install Head-Up Displays (HUD) for its domestic air carriers. The C919 equipped with the Kollsman EVS-SP displayed on the HUD will enjoy the operational benefits as well as improved safety and situational awareness allowing more aircraft into the airspace and at a faster rate.

Mr. Wang Jinyan, President of Shanghai Avionics Corporation, stated, "The award of C919 EVS-SP contract is the first step in collaboration between Elbit Systems of America and SAVIC. Given the emerging market of civil aviation in China, we believe this agreement will be the foundation of future collaborations between our two companies in the general aviation market to bring improved situational awareness while taking off and approaching. Technology industrialization, safety, and creating more value for the customers, shall be the common goal of both Elbit Systems of America and SAVIC."

Commenting on this milestone, Elbit Systems of America President and Chief Executive Officer Raanan Horowitz stated, "Since the development and certification of the first commercial EVS, our Enhanced Vision Systems have offered the aviation industry increased flexibility and safety. We are proud to have been selected by SAVIC/COMAC for the C919 and look forward to continuing our legacy in commercial aviation."

Elbit Systems of America is an industry pioneer in Enhanced Vision technology having certified the first EVS in 2001. With over 1,500 systems delivered to date, the Kollsman EVS is certified and installed on 13 aircraft models including business jets and Part 121 aircraft.

Forward Looking Statement

This press release contains forward-looking statements (within the meaning of Section 27A of the Securities Act of 1933, as amended and Section 21E of the Securities Exchange Act of 1934, as amended) regarding Elbit Systems Ltd. and/or its subsidiaries (collectively the Company), to the extent such statements do not relate to historical or current fact. Forward-looking statements are based on management's expectations, estimates, projections and assumptions. Forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. These statements are not guarantees of future performance and involve certain risks and uncertainties, which are difficult to predict. Therefore, actual future results, performance and trends may differ materially from these forward-looking statements due to a variety of factors, including, without limitation: scope and length of customer contracts; governmental regulations and approvals; changes in governmental budgeting priorities; general market, political and economic conditions in the countries in which the Company operates or sells, including Israel and the United States among others; differences in anticipated and actual program performance, including the ability to perform under long-term fixed-price contracts; and the outcome of legal and/or regulatory proceedings. The factors listed above are not all-inclusive, and further information is contained in Elbit Systems Ltd.'s latest annual report on Form 20-F, which is on file with the U.S. Securities and Exchange Commission. All forward-looking statements speak
